Enterprise IT Business Solutions

ITIQ has the expertise to design sophisticated enterprise IT Solutions for increasing the efficiency of your Business. **ITIQ deploys solutions that align your IT Systems with your business strategy** transforming your organization to a high performing, productive, customer responsive organization.

ITIQ designs and builds robust system architectures and applications to support your specific core mission critical and service functions. ITIQ designs, deploys, and supports the following systems:

- Financial Systems
- Enterprise Resource Planning
- Manufacturing and Supply Chain
- Manufacturing Execution Systems
- Customer Relationship Management
- Demand Forecasting
- Management Reporting Portals
- Engineering & Scientific Applications
- Analytical Process Control
- Human Resource Management
- Application Integration
- Data Warehousing
- Collaboration Systems
- Knowledge Management

ITIQ is not vendor specific. Our technical team will only recommend the solutions that are ideal for your business. We consider your business requirements, short and long term growth strategy, and budget constraints when recommending a solution.
